## Our Partner, Our Pride

**Q. So we learned you were just 18 when you started off this quest. What pushed you forward at that young age?**  
Ramesh Agarwal: It was the quest for freedom to help promote domestic stainless steel in India, the realization that struck me quite early while I was selling imported stainless steel products. In 1978, I could finally anchor my ship, with the help of Alloy Steel Plant (ASP) Durgapur, which is now a part of SAIL, the only plant producing stainless steel then. I was not just promoting their products, but was a part of their managing and asking questions too. Apart from ASP, I also started working with Vishva Sanyal, Bhadrachal which is also a part of SAIL, now part of Tata Steel, where I introduced the production of stainless steel and became their sole distributor. Later, we partnered with Mahindra too. And soon came a time when we consistently shipped selling imported products. The quest that I had initially undertaken with a nationalist bent picked up full throttle, and our business started growing by leaps and bounds.

**Q. In a story of entrepreneurship, nobody would say for the realization of one of the brightest & inclusive minds. We all know the brothers turned the tide of stainless steel through their business quest and great vision.**  
It all started in the month of 1985, when the father of the Agarwal brothers, Bharadwaj, set off on his stainless journey. He was only 18 at the time, ambitious to the best of his and his late, although brothers would give him sound & practical advice. It was indeed the perfect beginning with an understanding in many years of independence. But when you look back, when we were still dependent on imports, for capital, consumer industries, 'how does' this generation remained in the heart of the Agarwal brothers, in this larger free enterprise system, are the reasons from their life, work & entrepreneurship, to this world.

**Q. How do you see the stainless steel industry in India today?**  
Ramesh Agarwal: It was the quest for freedom to help promote domestic stainless steel in India, the realization that struck me quite early while I was selling imported stainless steel products. In 1978, I could finally anchor my ship, with the help of Alloy Steel Plant (ASP) Durgapur, which is now a part of SAIL, the only plant producing stainless steel then. I was not just promoting their products, but was a part of their managing and asking questions too. Apart from ASP, I also started working with Vishva Sanyal, Bhadrachal which is also a part of SAIL, now part of Tata Steel, where I introduced the production of stainless steel and became their sole distributor. Later, we partnered with Mahindra too. And soon came a time when we consistently shipped selling imported products. The quest that I had initially undertaken with a nationalist bent picked up full throttle, and our business started growing by leaps and bounds.

Dr. Ramesh Agarwal

It took a great deal of energy and diligence. Today, when we see his dream turning into a reality, we can proudly say that our partnership has been fruitful.

**Q. What message you would like to give to our future generations?**  
Shankar Agarwal: The only message we can think of is what we ourselves have followed all these years and it worked like magic for us, work hard to get whatever you want in life. Everything is possible if it accompanies good intention. But as you reach close to your aim, don't be greedy, value what you have. We had many opportunities to earn easy money in this business. But that comes through sacrificing your integrity, which we have never done.

**Ramesh Agarwal Adding:** Also, to all those who contribute to the stainless steel industry, Jindal Stainless is the company to work for, not just for its world-class innovative products but also for its people and leaders. What we see in Mr. Ratan Jindal once is what we see in Mr. Akhendra Jindal today. He nurtures his father's business acumen and humility. I am sure he will soon be among the great leaders of the industry.

**Shankar Agarwal's Brother**  
Ramesh Agarwal: The eldest brother & Chairman of SSU Steels Ltd., a leader in stainless steel segment.

**Shankar Agarwal, aka Parthiv for his problem solving ability, is the Group Chairman of Reliable Stainless & Jindal Stainless' star distributor in Mumbai.**  
Satish Agarwal, the youngest of the brothers, is the Managing Director of Anant Overseas & Jindal Stainless' star distributor in Delhi. The three brothers hold deep regards for their teams which have increasingly supported them all through the long journey. Today, Shinde Agarwal, Mayank Agarwal and Anil Agarwal, sons of Ramesh, Shankar and Satish Agarwal are carrying forward the stainless legacy of their fathers.
